StrokeAegis AI

AI-Powered Stroke Reporting & Integrated Solutions
Clinical Decision Support Platform (Multi-Agent Architecture)

REPORT ID: SA-2026-MARIAM-LACUNAR
DATE: September 20, 2026 - 14:43 UTC
STATUS: VALIDATED AI ASSESSMENT
ACCESS: Confidential Medical Documentation

1. Patient Demographic & Vitals Profile

Patient Name: Mariam Al-Dosari	**MRN:** MRN-202609-004	**Attending Neurologist:** Dr. Sarah Al-Mansoor, MD	**Record Status:** Active Patient File
Gender: Female	**Age:** 63.0 Years	**BMI:** 27.5 kg/m²	**Smoking:** never smoked
Hypertension: Positive (Yes)	**Cardiac Disease:** Negative	**Average Glucose:** 142.8 mg/dL	**Residence:** Rural

2. Clinical Machine Learning Stroke Risk Stratification (StrokePrediction-V2)

Predicted Probability: 42.8% | **Risk Tier:** MODERATE DANGER TIER | **Decision Threshold: 49.0%**

Clinical Risk Multipliers: Standard demographic parameters

Model Rationale: Vascular hazard evaluation calibrated by machine learning ensemble.

3. Diagnostic CT Neuroimaging & Explainability (EfficientNetV2-S + GeM)

Gatekeeper Safety Status: Passed Gatekeeper (99.2% Brain CT confidence)
Primary CT Classification: ISCHEMIA (88.7% Confidence)
Status Banner: N/A
Lesion Localization: CT Neuroimaging: Ischemia
Hotspot Lesion Coverage: 0.0% of Brain ROI

No lesion overlay required

4. AI Clinical Decision Support (CrewAI Guideline-Grounded Multi-Agent)

4.1 Hyperacute Emergency Stroke Management Specialist

Acute Summary: N/A
Reperfusion Considerations: N/A
Acute Blood Pressure Target: N/A

4.2 Guideline-Based Stroke Prevention Specialist

Vascular Risk Interpretation: N/A
Blood Pressure Target: N/A
Glycemic & Metabolic Target: N/A
Recommended Lifestyle Modifications:

5. Medical Safety & Clinical Validation Audit

Audit Outcome: PASSED | **Safety Verification:** PASSED | **Non-Autonomous Stance Verified:** True
Clinical Contradictions Detected: 0 | **Critical Safety Alerts:** 0

6. Integrated Clinical Action Plan & Executive Summary

Clinical decision support evaluation completed.

- **Follow physician guidelines and routine monitoring.**

7. Traceable Medical Guideline References (Medical RAG Knowledge Base)

CLINICAL DISCLAIMER: StrokeAegis AI is an AI-powered clinical decision-support system intended to assist qualified healthcare professionals. It does not replace clinical judgment, diagnosis, or physician decision-making and does not independently prescribe or order treatment.

Attending Physician Evaluation:

Dr. Sarah Al-Mansoor, MD
Status: ✓ **Certified & Digitally Signed**
